Tværsnit af stiktilslutninger

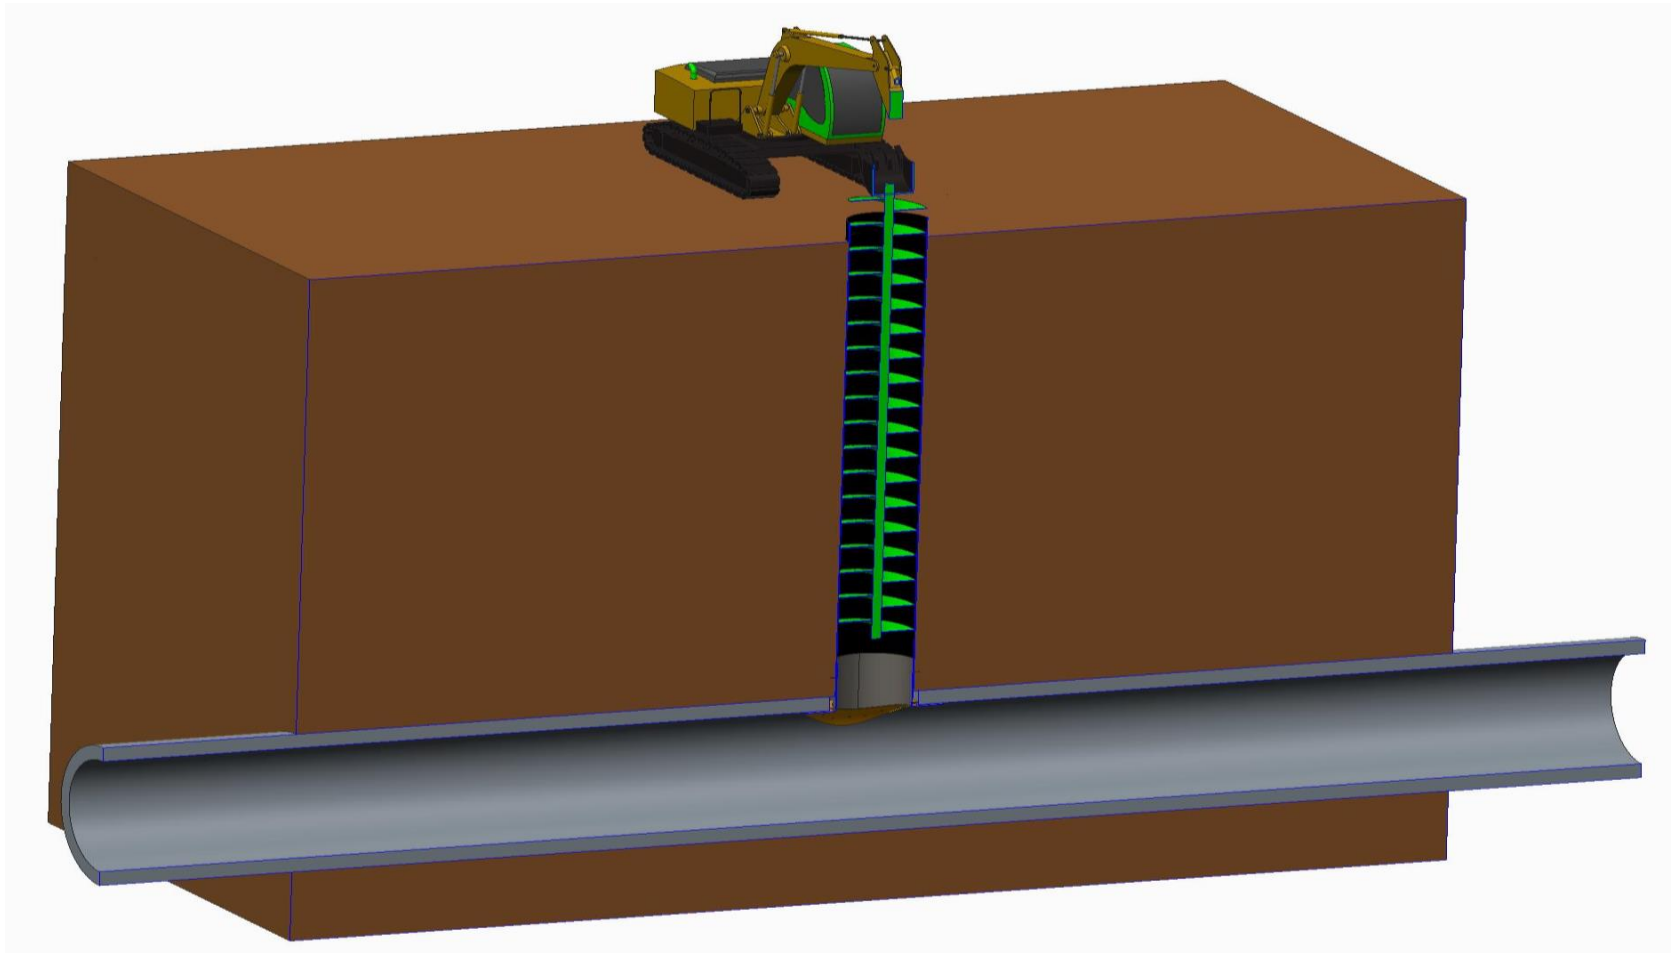

Gennemgang af mulige udførelsesmetoder

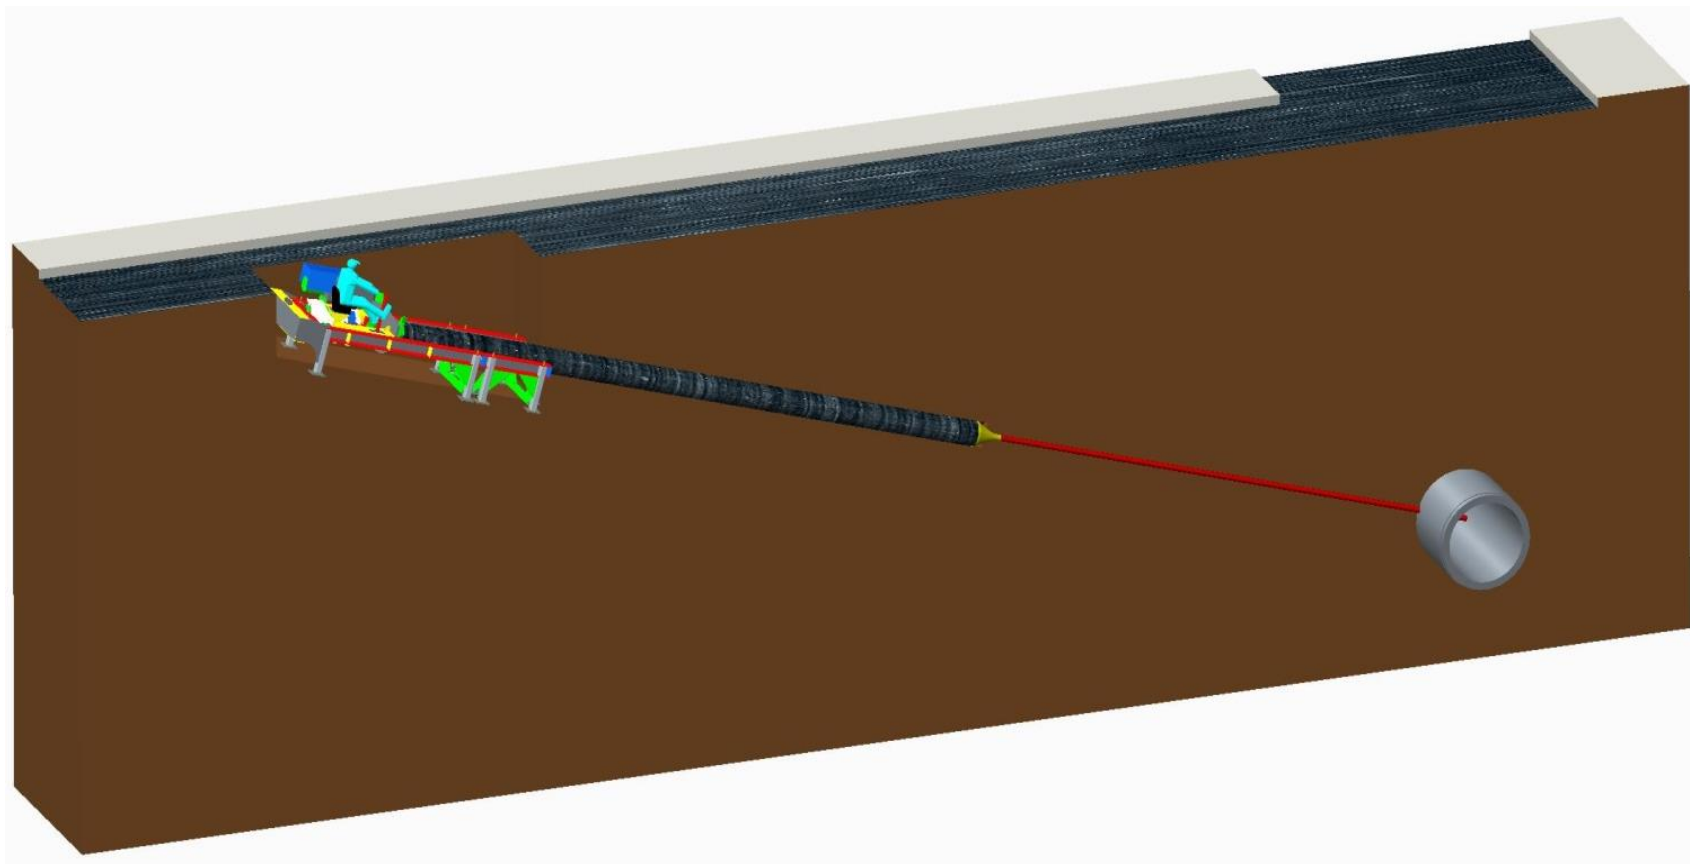

Med de i beskrevne plads/jordbundsforhold er der principielt 4 egnede metoder til stiktilslutninger på bassinledningen.

- Boring af lodret stålcasingsrør.
- Pilot/stålrørs metoden.
- Boring inde fra tunnelrør med mini-pilotrørs metoden.
- Boring inde fra tunnelrør med Pit-maskine, styrbar-metode.
